

**ORD/Regional Science Teleconference Series:  
Advancing the Science & Practice of Cumulative Risk Assessment:  
Alignment of ORD Research & Agency Needs**

**To participate in these conferences:** Register through the conference registration sites in the table below. The presentation and supporting materials provided by each presenter will be available for download at the respective registration site. Audio/visual archives of earlier seminars are available at the websites, as indicated.

**About the Seminar Series:** These publicly accessible seminars are a forum for discussing the current state of the art and practice of Cumulative Risk Assessment (CRA). These seminars will provide information regarding guidance, resources, and recommendations for real world CRA for regulatory and non-regulatory applications. This seminar series is, in part, preparation for the EPA ORD/Regional Workshop on CRA being sponsored by the ORD Office of Science Policy and being hosted by Region 5 in Chicago, IL, July 28-30, 2009. The seminar series is publicly open in support of advancing CRA while the workshop will primarily be internal to EPA to enhance policy and other deliberative discussions. Edited transcripts of these seminars will be included in the Workshop Proceedings.
